A-Tac Mats

Your New Matting Program

EnhanceMats.com

877-318-8625

Do you know what is dirtier than dirt? The contracts that rental companies lock you into with matting programs that are supposed to help stop dirt.

TRADITIONAL PURCHASE MATTING

A-TAC WIPES

For Cleaning your floor before laying down A-Tac Mats

ATACWIPES6CS

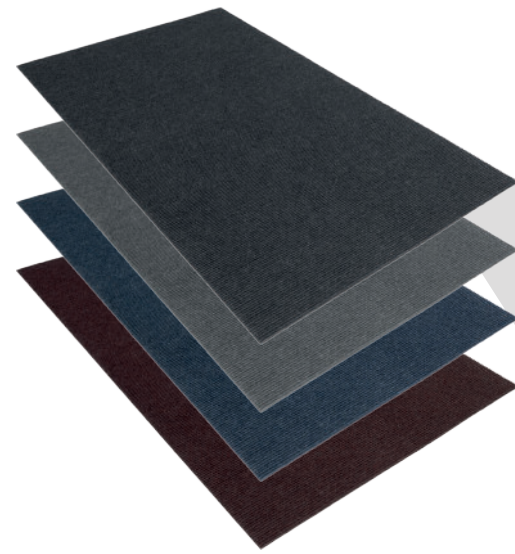

For getting the best results out of your A-Tac Mats, prep your floor with A-Tac Wipes to ensure that it is free from any dirt, grime, oils, or residues before installing your mat.

- ✓ No specialized cleaning equipment needed. Just vacuum or sweep
- ✓ Reduced maintenance labor
- ✓ Minimal upfront costs
- ✓ Backing prevents movement, making the matting safer and easier to care for
- ✓ Modular program gives ability to create perfect size for changing seasons / needs

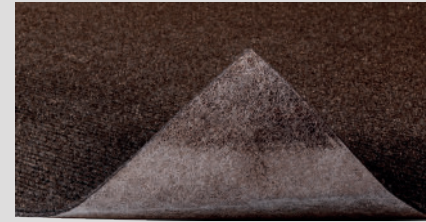

RENTAL MATTING

- ✓ No Contracts!
- ✓ No hidden fees
- ✓ Scalable program gives ability to create perfect size for changing seasons / needs
- ✓ You maintain possession of your mats
- ✓ Backing prevents movement, making the matting safer and easier to care for
- ✓ Recycled top-cloth is eco friendly
- ✓ Reduced environmental impact with no commercial washing, reduced water and chemical consumption, and reduced fuel usage

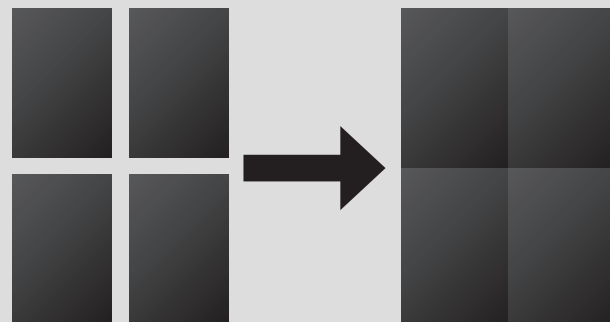

A-Tac Matting is the first and only matting solution of its kind. The scalable system adapts to protect your floors no matter the season/weather. Easy cleaning means better results. No contract means none of the headaches associated with rental programs.

- Control how often each mat is replaced based on your individual needs
- Control the costs of your matting program
- Control how many or how few mats are needed based on the seasons, weather, and your traffic patterns.

ADAPTS TO YOUR NEEDS

The A-Tac Mat system is modular, which means the number of mats on your floor can be adjusted depending on your needs. Weather is often a major factor in the amount of protection your facility's floor requires. Fortunately, A-Tac Mats has you covered! Our edgeless mats and proprietary adhesive backing means that you can combine several mats to create one, virtually seamless, protective surface that will stay put, no matter how much rain or snow is being tracked in or how many boots are wiped clean.

...of the dirt and debris entering a facility comes in on the shoes of its occupants.

...of dirt and debris entering the building can be captured with a proper matting program.

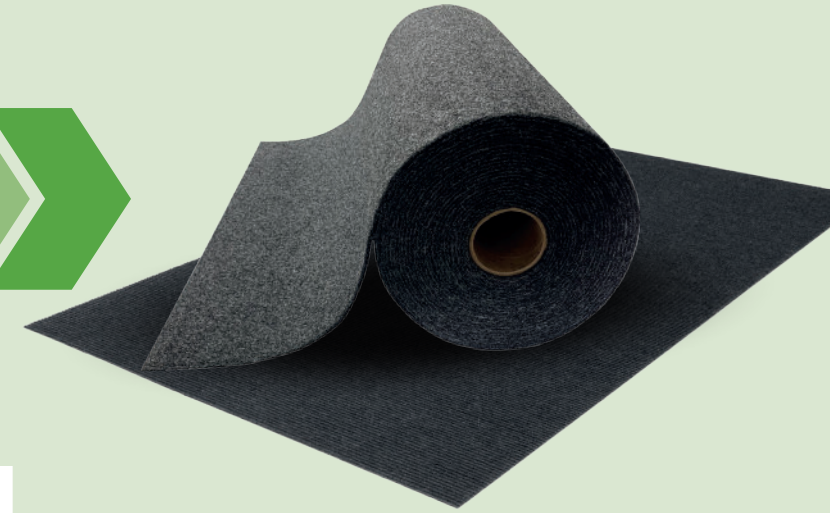

...people entering a building without entrance matting can remove up to 42% of the finish from the floor.

A-TAC MATS don't just keep your floors clean, they help keep the environment clean. Made with 90% recycled content, we help keep plastics out of landfills and the ocean, and put it to work stopping dirt from entering your building.

90% RECYCLED CONTENT

COST PREVENTION

Because it can cost over \$800 to remove a single pound of dirt from your building, it's critical to stop it before it ever gets in. Up to 85% of this dirt, debris and moisture can be captured in the first 10-15 feet of matting, but only if an effective and comprehensive matting system is in place. To prevent your maintenance costs from spiraling out of control, you need more than "traditional" matting. You need an A-Tac Matting program.

RENTAL MAT COMPANIES

routinely collect and treat their mats with chemicals while consuming large amounts of water in the process which isn't ideal for the environment in order to return the mats to their customers in a usable condition. The perpetual pick-ups and deliveries also mean massive amounts of fuel consumed by the large fleet of vehicles.
